

### DISCLAIMER

Note: These codes are valid for billings to Medicare Administrative Contractors (MACs) for dates of service on or after October 1, 2009.

It is important to keep in mind that private payors and state Medicaid programs may continue to use or require use of the ICD-9-CM diagnosis codes from the October 1, 2008, release until January 1, 2010, or after.

In the absence of written notifications or bulletins from other payors we recommend that you verify which version of ICD-9-CM to use for claims with each one of your other payors.

This quick reference contains many of the more frequently used codes; however, the ultimate responsibility for correct coding lies with the provider of services.

The codes included in this compilation were independently selected by The Lash Group and are not intended to encourage or suggest a use of PROCRI<sup>®</sup> (Epoetin alfa) that is inconsistent with the FDA approved [full Prescribing Information](#), including [Boxed WARNINGS](#), for PROCRI<sup>®</sup>.
